Column Rearrangement

Table Configuration (Advanced Mode) · https://ninjatables.com/docs/column-rearrangement/

Ninja Tables lets you do an easy table Column Rearrangement. Columns can be rearranged in whatever order you like. This function uses the basic drag-and-drop technique. Simply drag a column and drop it where you want.

Let’s dive into the article to learn how to accomplish it.

- Click the **Table Configuration** tab, you will find a new window appearing with the **Columns** option on the left sidebar.
- The **Table Column Settings** area will appear on the right, where you will see the **Available Columns** of your table.
- Drag and drop your columns into the desired place by dragging the hamburger icon on the left of each column.

That’s how easy it is to do column rearrangement Ninja Tables!
