Create Custom Column in WP Post/CPT/WooCommerce Table

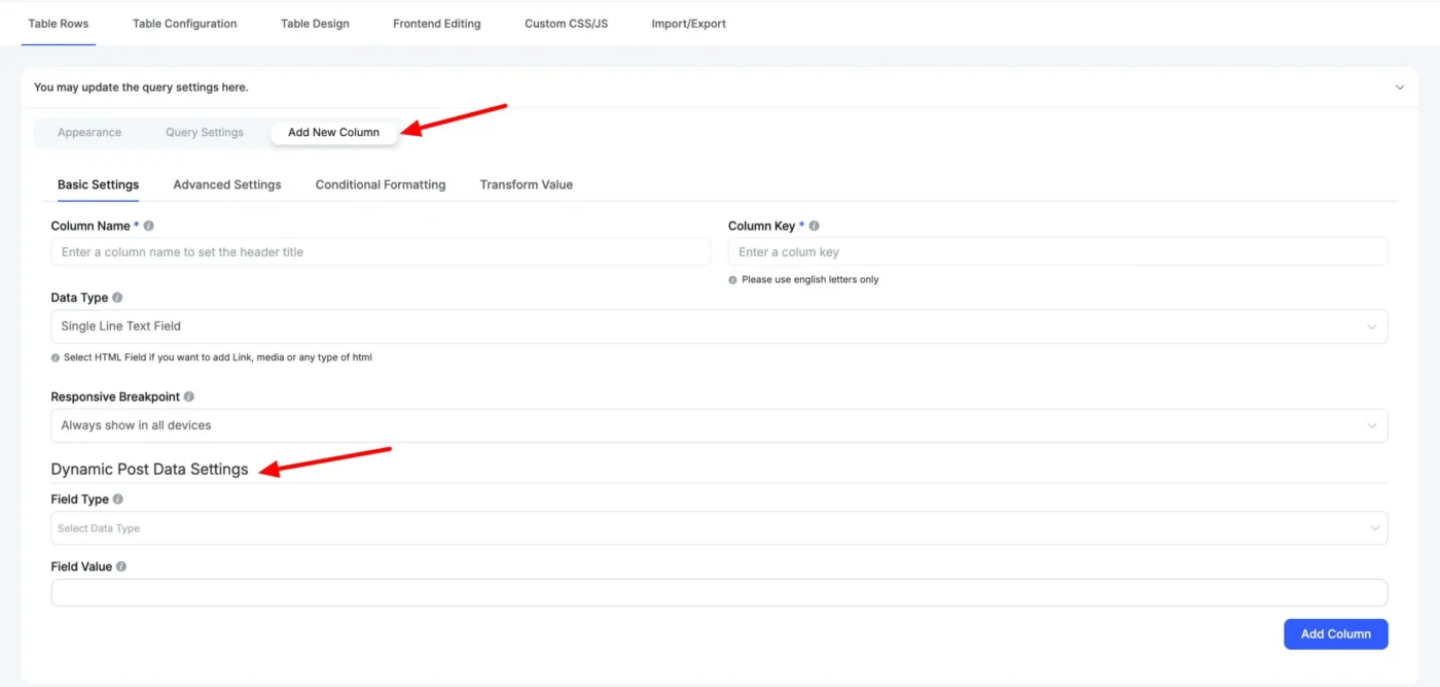

Advanced Integration Settings (Dynamic Post Data Settings) · https://ninjatables.com/docs/create-custom-column-in-wp-post-cpt-woocommerce-table/

Ninja Tables can be synced with **WP Posts** and Pages. With the help of this feature, any post can be incorporated into your tables using Ninja Tables.

You can easily create custom columns or Custom Fields in the WP Posts table, or even in WooCommerce tables by going through some easy steps.

Add Column to WP_Posts Table/WooCommerce Tables

- Go to the **Add New Column** tab of a WP Posts table or WooCommerce product table.
- Scroll down & then you will get the **Dynamic Post Data Settings**. Choose your preferred Field type.

Dynamic Post Data Settings

You can also check out **Post Meta**, **Shortcode / Computed Value or HTML**, & **Featured Image**.
