Define User Role Permission for Table Users

Miscellaneous · https://www.ninjatables.com/docs/define-permission-for-table-users/

With Ninja Tables, you can easily define who can add or edit your tables.

To change your user role permission settings, go through the following steps -

- Go to **Ninja Tables → Tools** from your WordPress Admin Panel.
- Click on **Permission** from the left sidebar.
- Select the **Permission** Settings you are comfortable with from the Checkboxes. You can also **check all** of the roles, or you can check any specific role as well.

Permission option

Click on the **Save** button then everything will be set accordingly.
