Language Settings

Table Configuration (Advanced Mode) · https://www.ninjatables.com/docs/language-settings/

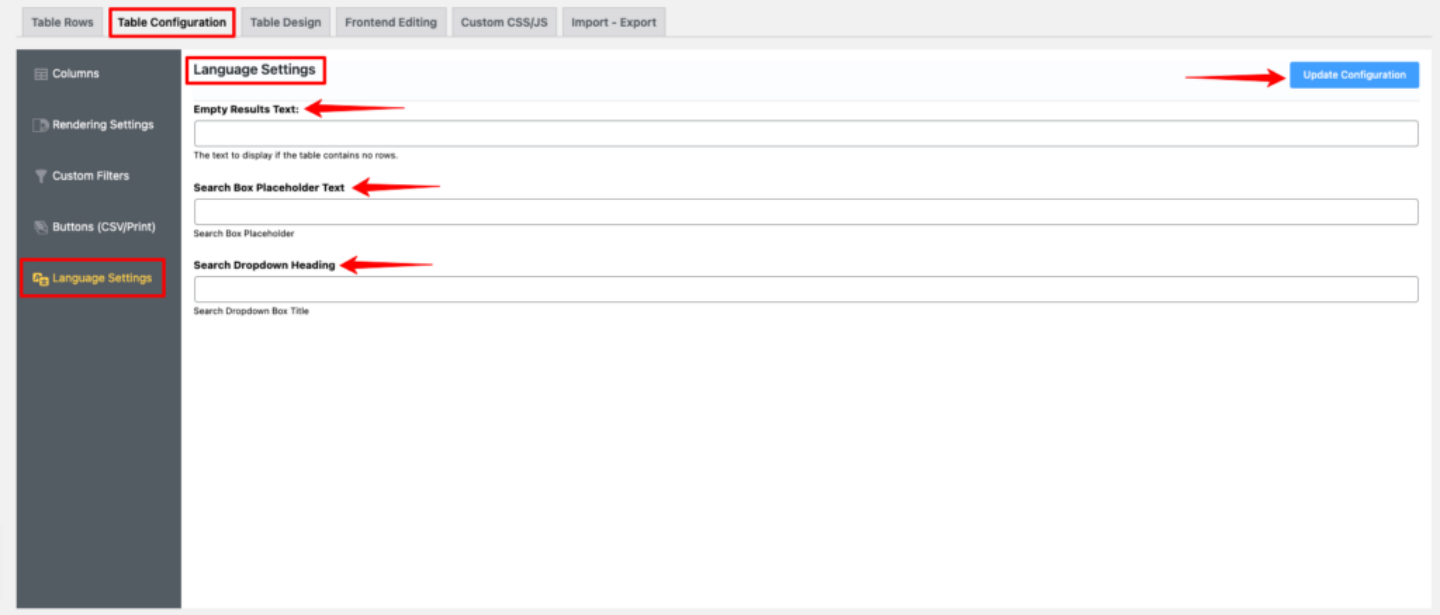

The **Language Settings** in Ninja Tables lets you select any language for your tables according to your needs.

Follow this easy guide to set up the language settings in your table.

- The first step is to go to the **Table Configuration** tab, where you will find the **Language Settings** on the left side.

- After clicking on this option, you can configure your preferred language for three settings.

  Such as- **Empty Results Text**, **Search Box Placeholder Text**, and **Search Dropdown Heading.**

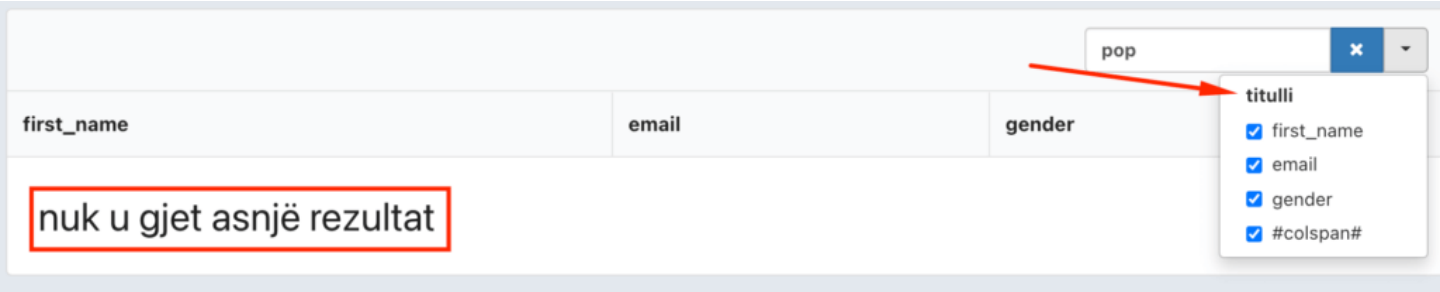

- The title of these options already explains the functions, you can place the language you want and then click on the **Update Configuration** to save the settings.

- In the final step, you just have to preview the output to see the results of your table. In the table given below, words are set to **Albanian** in the search placeholder when the table rows are empty

& in the dropdown heading.

This quick guide explains to you how to use **Language Settings** in your table easily.
