Other Design Settings

Table Design · https://ninjatables.com/docs/other-design-settings/

The last feature among the three styling tabs is the **Other** option. This tab contains numerous sections, such as

- **Pagination Items Per Page**
- **Pagination Position**
- **Search Bar Position**
- **Select Sorting Method**
- **Row Details**
- **Toggle Position**
- **Extra CSS Class for the Table**
- **Sticky Header**
- **Table Font Settings**

Styling | Table Colors | Other

Hide Pagination (Show all data at once)

Pagination Items Per Page

20

Pagination Position

Left | Center | Right

Scroll to table top for pagination change

Show Page sizes change option

Search Bar Position

Left | Center | Right | Default

Make search input as full width

Created At | By Column | Manual Sort

Sort Type

old_first

reset

Row Details (Responsive drawer)

Default | Expand First | Expand All

Toggle Position

First Column | Last Column

Extra CSS Class for the table

Enter text

Sticky First Column

Enable first column sticky for table

Sticky Header

Enable sticky header for table

Table Font Setting

Font Family

theme-font

Font Size

- The **Pagination Items Per Page** allows you to restrict the number of rows you want to view in the table. **Pagination Position** specifies the location or display of the pagination number. To know more, **check** here.

- The **Search Bar Position** determines where the search bar will be placed; the search input can also be set to full width.

- **Select Sorting Method** enables you to sort data in various ways. To know more about it, **go** here.

- **Row Details** configures the responsiveness. **Toggle Position** is used during a responsive breakdown where the **+** icon will show at the first/second visible column.

- **Extra CSS Class** for the table allows you to use additional CSS code if you want to include it.

- If you enable the **Sticky Header** option, the table’s header position remains fixed while scrolling.

- **Table Font settings** is a feature where the user can choose the font family & font size according to their needs. To know more, **click** here.
