Text Icon (Pro)

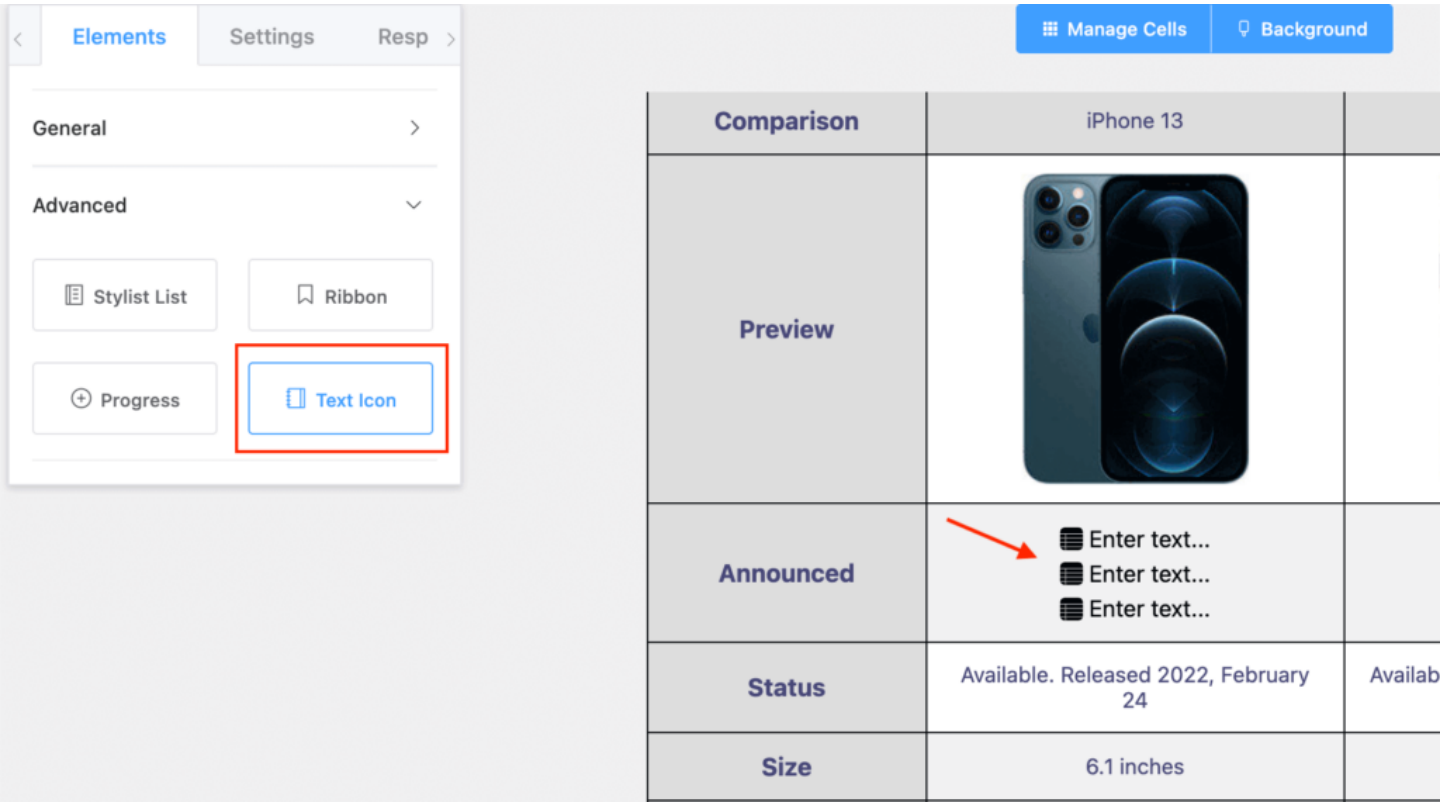

Table Elements · https://ninjatables.com/docs/text-icon-pro/

In the Ninja Tables Drag and Drop mode, you'll find Text Icon element. This element lets you add text beside an icon and it's only available as a pro element.

It's almost similar to the "Styled List" element because of the use of an icon and a text box side by side. However, the Text Icon element is a single text box and not a list. Unless you stack them as a list.

Let’s add a **Text Icon** element to our Ninja Tables and check its properties and possibilities.

Follow this path- **Elements >> Advanced >> Text Icon**.

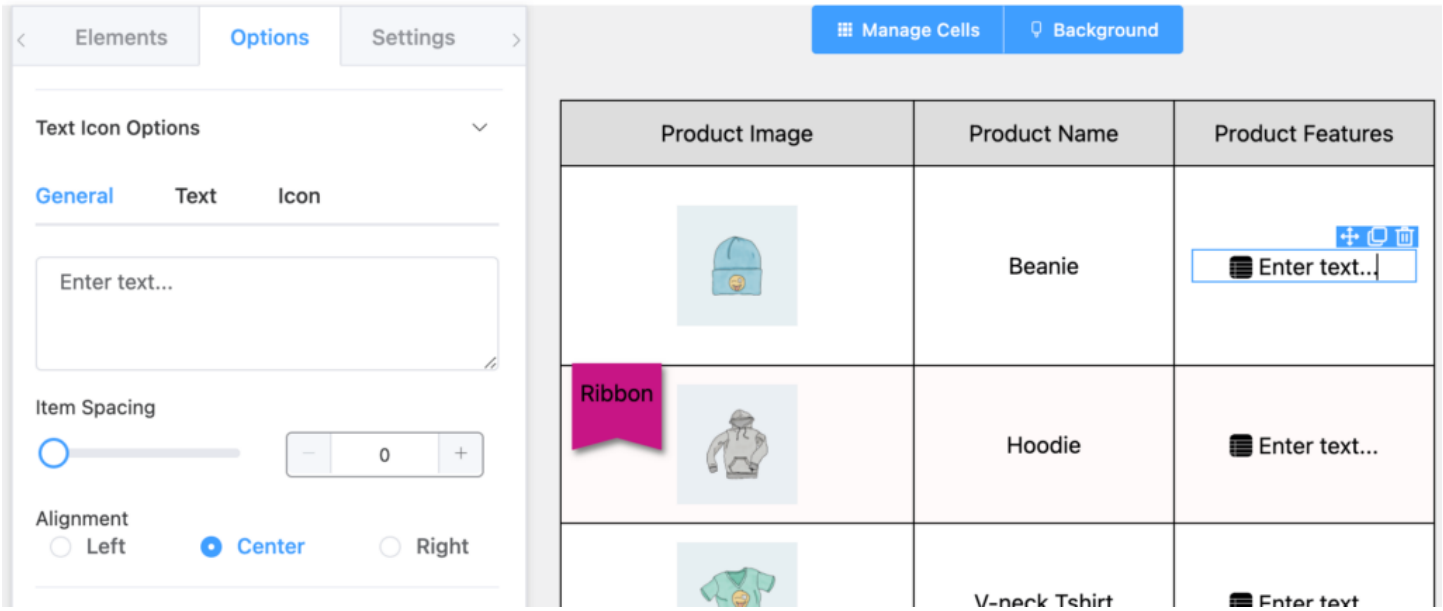

You can click the "Text Icon" cell and customize the icon and text both.

Properties of Text Icon Element
